

Reconstruction and translation of the first two lines:

$$\begin{array}{ccccccc}
 \text{Mayan Glyphs} & & & & \text{Mayan Glyphs} & & \\
 1 & 40 & \text{a-rá} & 1 & 40 & = & 2 \quad 46 \quad 40 \\
 100 & \text{times} & 100 & & & & 10,000
 \end{array}$$

$$\begin{array}{ccccccc}
 \text{Mayan Glyphs} & & & & \text{Mayan Glyphs} & & \\
 \text{a-rá} & 1 & 40 & = & 4 & 37 & 46 \quad 40 \\
 \text{times} & 100 & & & & & 1,000,000
 \end{array}$$

The calculation error due to the missing zero:

zero missing here

$$\begin{array}{ccccccc}
 \text{Mayan Glyphs} & & & & \text{Mayan Glyphs} & & \\
 21 & 26 & 29 & 37 & 46 & 40 & \\
 \text{(correct would be: 21 26 "0" 29 37 46 40)}
 \end{array}$$

$$\begin{array}{ccccccc}
 \text{Mayan Glyphs} & & & & \text{Mayan Glyphs} & & \\
 35 & 44 & 9 & 22 & 57 & 46 & 40
 \end{array}$$

This number is false (as are all following numbers), since the zero was not taken into account.
